HOW TO USE - Cele-Brat Lightroom Presets v1.0

1. The 3-step workflow (every image)

1. Set White Balance first (As-Shot, a grey-card value, or your own eyedropper). The presets never touch WB, so this stays yours.
2. Apply the preset. Pick the look (studio/photographer), then the variation that matches the light (see section 2).
3. Fix Exposure only if needed (+/- 0.3 to 0.7 is normal). Done. Do not stack two looks on one image.

Sync the same preset across the whole event with Sync / Auto Sync, then fix exposure per frame.

2. Which variation for which light

Variation	Use it on
01 Signature	The core look - general purpose, start here
02 Daylight Bright	Outdoor day, haldi / mehendi, bright venues - lifts exposure, tames highlights
03 Reception Night	Indoor LED / tungsten / low light - opens shadows, protects highlights, pulls saturation off orange/yellow so skin does not go orange
04 Soft Matte	Gentle faded version - couple portraits, bride getting ready, soft window light
05 Rich	Punchier, deeper version - editorial hero frames, decor, colourful outfits

Rule of thumb: one look per wedding, 01 for most frames, 02 for bright outdoor, 03 for receptions, 04 for soft portraits, 05 for hero frames.

3. Which look for which wedding

Studio Looks (Indian studios)

- Full-day mixed coverage, client-safe colours: KnotsbyAMP, Shutterink.
- Bright destination / lawn / beach / pastel decor: The Wedding Story (day), KnotsbyAMP.
- Bold, saturated, magazine-style hero frames: Joseph Radhik, Gautam Khullar.
- Night receptions, fairy lights, low-key drama: Fourfold Pictures, Gautam Khullar (03 at night).
- South-Indian silk / temple / gold: Studio A, WeddingNama.
- Soft romantic couple portraits and pre-weddings: Vivek Krishnan, Ramit Batra (04).
- Palace / heritage / golden hour editorial: Ramit Batra, Fourfold Pictures.

World Looks (fine-art photographers)

- Safe all-day “house” looks: Pablo Laguia, John Dolan, David Bastianoni, Abby Jiu.
- Bright, airy destination / pastel: KT Merry, Joel Serrato, Corbin Gurkin (strongest), James x Schulze (gardens).
- Golden warm outdoor and sunset: Jose Villa, Cinzia Bruschini, Norman and Blake, Bottega53.
- Moody, dramatic, low light and night: Erich McVey, Nirav Patel, Mili Ghosh (03 at receptions).
- Documentary / candid: Samm Blake, John Dolan, Heather Waraksa.
- Editorial and fashion-led: Kristen Marie Parker, Anni Graham, Greg Finck.
- Reds, maroons, sindoor outfits: Nirav Patel, Mili Ghosh, Jose Villa (05).

Glamour Looks (cover photographers) - for portraits and hero frames, not full documentary coverage

- Safest glamour on Indian skin: Alexi Lubomirski, Zoey Grossman, Greg Williams.
- Sunny / golden-hour cover portraits: Mario Testino, Zoey Grossman.
- Studio-style and flash-lit portraits, black-tie: Inez and Vinoodh, Luigi and Iango.
- Stylised colour (pink, lilac, neon, bold decor): Nick Knight, Txema Yeste, Emma Summerton (use Amount 50-70%).
- Moody cinematic night / grooms: Norman Jean Roy (03 at receptions).
- Rose / blush weddings, bridal makeup close-ups: Luigi and Iango, Nick Knight.

4. The Amount slider

Lightroom Classic 11+ shows an Amount slider above the preset list. 100% = as designed. 60-80% softens a strong look (Glamour, Joseph Radhik, Gautam Khullar, Txema Yeste, Emma Summerton); 120-150% pushes a gentle look (KT Merry, Pablo Laguia) harder.

5. Skin tone

- The presets were tuned so skin stays natural on Indian skin in every light. If skin still looks orange, the cause is almost always white balance or a tungsten/LED mix: fix WB first, then use variation 03.

- Do not add Vibrance on top; use Exposure and, if needed, a small Orange luminance change in HSL.

- Glamour looks target slightly rosier, cleaner skin and soften skin texture a little (Texture -4 to -8). For a true cover finish add light retouching and a +10 Texture local brush on hair, eyes, jewellery and fabric.

6. Mixing stills and film

Every look also exists as a Sony S-Log3 LUT (CeleBrat_All_LUTs.zip) with the same name and variation. Preset and LUT were verified to land within +/-2 RGB of each other on the same scene, so photos and video from one wedding match when you use the same look and variation.

7. Troubleshooting

- Preset looks flat / different: check the profile is Adobe Color (Basic panel > Profile). Camera Matching or Neutral profiles change the result.
- Preset does nothing on some sliders: Lightroom older than v13 ignores Process Version 15.4 colour grading; update Lightroom.
- Colours too strong on JPEGs: JPEGs already carry camera contrast; use 60-70% Amount or variation 04.
- Blown highlights at receptions: apply 03, then pull Highlights a further -20 if needed.
- Want B&W: apply the preset first, then press V (convert to B&W); the tone curve and grain carry over.
